

SW PROJECT MANAGER

FERMAX is looking for a SW Project Manager for the development of Cloud products.

JOB DESCRIPTION

- Product Development Management (mainly sw), ensuring the whole process in three combined angles: dead-line (time to market), defined quality and cost.
- Assure Product Lifecycle performance successfully for every type of customer.
- Set expectations up for new developments (requirements capture) coordinating Product Management (PM), Production Engineering (PE) or OPS-IT (SIS), Test Lab (QA) and any other interested parties.
- Analyse technical solutions from R&D (or third parties) or alternative sources and assure target requirements are fulfilled (both operations and market).
- Carry out Risk analysis of Projects managed, minimizing the uncertainty for success
- Work and Plan together with the Technical managers (R&D and PE) the human, material and economic resources required to achieve the targets of the Project
- Coordinate and Lead the Product Development Team (internal and/or external) to ensure compliance with the milestones and objectives of the products required.
- Report and responsibility over Phase Changes, ensuring the information given to manufacture is unique and clear
- Propose alternative Work Plans and Communicate immediately to responsible agents in case of any significant deviation or risk detected.

SKILLS REQUIREMENTS

- Software Engineering or equivalent expertise in SW development (CLOUD, apps, desktops sw).
- Deep knowledge of DEVOPS, CLOUD computing, data analysis, AI, network management, OSs (Windows, Linux, iOS & Android), as well as Object Oriented Programming).
- Proven skills in Software Project Management and Methods.
- Valuable minimum of 2 year experience in telco business in similar role
- Leadership and team-building capabilities
- Strong communication and relationship building skills
- Precise and wide-open view
- Results oriented and highly self-demanding
- Ability to analyze and solve problems (team and technical)
- Innovation and creativity skills
- Fluent English language is required
- Flexible and committed to meet company demands
